

Instructions

Form E51 - Dry Cleaning Chemical Usage

This form will satisfy the emissions inventory reporting requirement for drycleaning operations.

Drycleaning Operations should report the usage of all chemicals.

- This form should be completed in its entirety.
- Be sure to properly identify your company and include your plant ID number, which can be found on your operating permit and the emissions inventory letter from APCD.
- List the annual quantities used, next to the appropriate category, making sure to state the units of measure if the quantity is not stated in gallons. If another solvent was used, then please state the material and quantity used after "Other" at the bottom of the column, or on a separate sheet of paper that is attached to this form.
- The simplest way to determine the solvent usage is by the inventory method. The beginning inventory of quantities at the start of the year, plus quantities purchased during the calendar year, less the ending inventory of quantities at the end of the year. This result will yield the quantity of product used during the emission reporting year.
- This form must be authorized and signed by the appropriate Company Official.

Industrial Classification Codes:

Check only one box.

For dry cleaning plants except for rugs:	SIC: 7216
	NAICS: 812320
For dry cleaning, coin operated:	SIC: 7215
	NAICS: 812310

The "Page Identifier" box at the very bottom is a place where you can enter your own identifier for this copy of this form.

Louisville Metro Air Pollution Control District
